Git Hub Acc **:** **https://github.com/Moe-Wai-Yan**
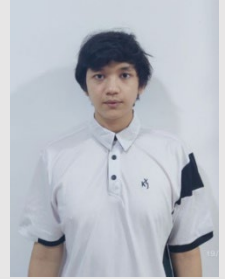

My name is Moe Wai Yan, and I am applying for the Junior **Backend Developer** position.

I have experience contributing to a group project called **"One Project One Month,"** where I worked together with other developers

I worked with **Laravel**, a backend framework, to build **APIs**. Although I have some experience in full stack development, I personally prefer working in the **backend role**, especially because I enjoy solving errors and handling backend logic.

I'm always eager to learn new technologies and grow as a developer. I'm currently looking for an opportunity where I can contribute to a team and improve my skills in a professional environment.

I'm open-minded and have a high passion to learn. I had a strong interest in IT fields, and I thank you for considering my application. And look forward to the possibility of contributing and learning from your team.
